Education

Lebanese American University

BS in Computer Science

Achrafieh, Beirut

Graduating Spring 2023

Projects

Surmir Game *April 2022*

- Designed a small video game for a game development course
- This project was made using Unity and C# using only free assets
- This is a running game that includes enemy AI and avoiding obstacles
- <https://github.com/Yousefgh1/Surmir-Game>

Virtual Lounge *February 2023 – May 2023*

- Designed a website meant for students that includes a chatting system, a forum where you can make groups, make posts, and comment on those posts.
- This is my senior project, and it is being developed using ReactJS and NodeJS
- This website contains front-end and back-end.

Pokedex Project *April 2021 – May 2021*

- Designed an application that included a database of Pokemon and all the information players need when playing the game.
- The application was made on Android Studio
- <https://github.com/Yousefgh1/Pokedex-Project>

GitBot

October 2021 – December 2021

- Created a GitHub bot in collaboration with two other colleagues
 - Worked along with the company LinkIT to complete this project
 - The bot was made using java. It is implemented on GitHub and it merges pull requests and automatically fixes merge conflicts
 - <https://github.com/SETeam999/GitBot>
-

Skills

- Proficient in Java, JavaScript, CSS, HTML, Python, and C#
