## Education

### Beirut Arab University

Lebanon

Master of Engineering, Project Management (GPA: 4.00 / 4.00)

June 2021

Project: Studying the effect of Building Information Modeling (BIM) on risk mitigation in construction projects

- Identified the critical risk factors affecting constructions projects through an extensive literature review.
- Designed and prepared data collection tools using google forms.
- Collected data from 46 experienced engineering managers in the MENA region through interviews, emails, instant messages and referrals.
- Analyzed the collected data and conducted hypothesis testing using Microsoft Excel software.
- Produced a report detailing the influence of BIM on the crucial risk factors affecting projects.
- Provided recommendations to utilize the findings for planning better risk mitigation strategies.
