PROJECTS

<https://github.com/youssefantoury/>

- Solar flares multivariate TS-prediction model based on Nasa's DSCOVR satellite data
- ETH value TS-prediction model
- Full-stack e-commerce web application for buyers and multiple sellers, using PHP, in which I designed the UI/UX, database, backend and deployed the project, which I can show in the interview.
- Contacts and Groups management app in Java Swing
- Browser Games website, including 2 games coded in pure JavaScript (Snake, Tetris)
- Many other artistic projects (short movies...)
