Hadath, Sector 2, Street 69

Educational background:

March 2022 - Present

ISSAE – CNAM Beirut

University Diploma in Electrical Engineering and Industrial Computing Technologies – Code: DUT1000A

September 2020 – July 2021

**Faculty of Engineering of the Lebanese University
Roumieh (ULFG2)**

- Interruption of the first-year follow-up for health reasons
- Successful completion of the entrance exam in the 1st year of the Common Core

October 2005 – May 2020

École des Sœurs de la Charité de Besançon – Baabda

- Obtention of the Lebanese Baccalaureate – General Sciences
- Graduated with honors

Skills:

Language Level

Arabic (native)

Fluent English – SAT Test (1130/1600)

Fluent French – DELF B2 (82/100) – Scored ‘A’ in the

Aptitude Test of The Saint Joseph University of Beirut (USJ)

Computer Skills

Microsoft Office: Word, Excel, PowerPoint

Hobbies and Interests:

Practice of Byzantine Music at the School of Ecclesiastical Music of Mount Lebanon – SEM

Art, Music, Classical Ballet, Rhythmic Gymnastics, Aviation, Cars and Motor Sports.

Currently a student at CNAM Beirut in the first year of electrical engineering, my ambition would be to pursue a specialization and career in aeronautical engineering. In this context, I was admitted to Sorbonne University to prepare my bachelor's degree in electronics, electrical energy and automation 3EA, next academic year (2022-2023), to then be able to continue the major of my dreams at one of the greatest engineering schools of France.

Indeed, my passion for automation has urged me since the first year of high school to pursue my studies with enthusiasm and dedication. I learned to team work with an open mind and acquired various skills, on one hand in communication and on the other hand in mathematics and physics. I find myself seriously involved in scientific reasoning, and the use of tools related to physics.

I would like to find an internship or job in automation to build foundations of experience in this field, serving as a luggage for my journey to France.
