OBJECTIVE

Last semester studying computer Science at the Lebanese American University (LAU) in Beirut.

EDUCATION

Bachelor's degree of Computer Science, Lebanese American University
2019 - present
Graduated from Houssam Eddine Hariri High school
Saida, Lebanon
2011-2019

Training

- The Lebanese company for development and reconstruction of Beirut central district (Solidere). I worked in the IT department where I helped in an application for the company with some crystal reports. I also worked with the networks team and got introduced on how to troubleshoot and route statically and dynamically.
-

Projects

- **Fall 2021:**
Created a website, "ADZ", that is connected to a database and allows the user to sign in, place ads, and have a profile in Software Engineering (CSC490) course in LAU.
 - **Fall 2021:**
Created an Automated attendance system using CNN in Artificial intelligence (CSC460) course in LAU.
 - **Spring 2021:**
Created a Linux shell that simulates the OS services sing threads, processes, scheduling, and communication for Operating Systems (CSC326) course in LAU.
 - **Spring 2021:**
Created a database for a car insurance company for Database (CSC375) course in LAU.
 - **Fall 2020:**
Creates a simple RISC processor that stores, loads, and branches instructions for Computer Organization (CSC320) course in LAU.
