## PROJECTS

---

### Setting up a database for a dental clinic

- Collaborated with a team of 3 people to set up and update a MySQL database for a dental clinic.

### Setting up a database for a supermarket with an online ordering site

- Collaborated with a team of 3 people to set up a MySQL database for a supermarket and enable content display through a PHP-built webpage for an online ordering site.

### Developing an Arabic Dialect Detector

- Collaborated with a team of 3 people to develop a method for supervised machine learning to distinguish Arabic dialects in input text. The approach utilizes deep learning models alongside traditional classification algorithms such as Support Vector Machine, Naive Bayes, and Logistic Regression.

### Developing a remote health monitoring system

- Contributed to the development of a remote health monitoring system by creating the front end, which enabled access to health readings via a React Native-based application.
