## PERSONAL DETAILS

Date of Birth

16-11-1999

Marital status

Single

Nationality

Lebanese

## COURSERA CERTIFICATIONS

Introduction to molecular spectroscopy

Coursera

I have taken an online course "Introduction to molecular spectroscopy". The aim goal of this course is to increase the knowledge in spectroscopic techniques (UV-Visible, IR, NMR) in addition to graded tests and another part for detailed video that explains how to use each instrument in laboratory while doing any analysis.

November 2021

Self employed

Private Tutor

(March 2020 - February 2021)

Giving Private Lessons in Physics and Chemistry for a student in grade 10 and helping her confronting difficulties in studies

## EDUCATION

Lebanese University Faculty of Sciences

Master 1 Analytical Chemistry

(September 2020 - August 2021)

77/100

Fresh graduated from the Lebanese University with a master 1. Discovering new courses related to chemistry with some experience in the laboratory using HPLC and GC

## LANGUAGES

English

Advanced Mid

Lebanese University Faculty of Sciences

Bachelor's degree Chemistry

(September 2017 - August 2020)

69.46/100

Three years for obtaining a bachelor degree in Chemistry, i have discovered many experiences through laboratory.

Our Lady Of Apostles High School

Baccalaureate degree Life Science and Earth

(September 2002 - July 2017)

14.17/20

In my 17 years at school, i have graduated with a baccalaureate degree in life science and earth with honors and i had passion through scientific fields such as chemistry, physics and math

## ACHIEVEMENTS

Responsible of my M1 class

November 2021

Education

In my first year of my Master M1, i was responsible of my classmates by helping them achieving difficulties, collaborating with each others about projects given, class notes and different field of studies. In addition to that, i was collaborating with many doctors in order to take responsibility to deliver everything for students.

## SKILLS

Teamwork and conflict Management  
Good

Analytical Skills  
Good

Decision Making  
High

Enthusiasm  
High

## PROJECT

Writing a memory to defend our thesis in M1

(January 2021 - March 2021)

Our thesis was to discuss an analytical topic: Detection of adulteration of fresh olive oil using spectroscopic techniques coupled with chemometrics. Each one of the group have to search between articles for relevant information about adulteration of olive oil ; after that we discussed between us for the most important things to write them in this memory thesis
