Iyad Al Mokdad

Undergraduate student

An undergraduate student seeking an opportunity to hone my current skills in software engineering. Hard worker and calm under pressure. Motivated by innovative projects and ideas, creativity and perfectionism, hoping to make a positive impact, however small, every chance I get.

Python · Java · C++ · MYSQL · C#
R Programing · Assembly · HTML · CSS
Java · Microsoft Office · Zoom, Webex
Microsoft Azure data studio · Postman
Android Studio · Github · Targetprocess · Slack
Unity

PERSONAL PROJECTS

SMEP (sort my email into projects) (02/2021 - 05/2021)
- My team and I created a website where you could sort your email inbox into different projects receiving any email from anyone of any subject will go into it's specified folder. I worked on the APIs using Flask and Python as well as the frontend using HTML, CSS and JavaScript

Track Race Recorder (02/2021 - 05/2021)
- My team and I worked on a website for track racers, keeping tracks of records of racers and records of specific events and championships. I worked on the backend of this Project using MYSQL and Microsoft Azure data studio

Fall Ball (02/2021 - 05/2021)
- My colleague and I worked on a game development project using Unity and C# we created a game where you should rotate a platform until a ball reaches it's specific target

Attendance Tracker (10/2021 - 12/2021)
- My team and I developed an android application using a local database, SpringBoot and Android Studio, this Application took attendance using a specific barcode, and let's the instructor keep track of the attendance of his student. The class could also interact on the application by answering polls the instructor would create and we would fetch the data of these polls back to the instructor.
