EXPERIENCE

Optinet Services (Networks company)   *June 2017 – July 2017 | November 2020 – January 2021*

Beirut, Lebanon

Position Held: Networks and Telecommunication Architect

❖   Coordinated with the Middle East Airlines(MEA) in implementing the wide spread of fiber-optic cables

❖   Pioneered the fiber-optic distribution across the Airport

❖   Acquired problem solving skills through diagnosing network issues, using the proper equipment

Netways (International IT consulting firm)   *August 2019 – September 2019*

Beirut, Lebanon

Position Held: Business Analyst Intern

❖   Designed Business rules using Dynamics 365 for customer engagement customization

❖   Developed a beta version of a student course registration system under the supervision of the development management team, ultimately achieving a more efficient process for students to sign up for courses

❖   Built the Database using SQL server to create tables that collate data for each registration entry by every student to their course, semester, and professors.

❖   Configured email workflows and alerts for the student course registration system, promoting operational proficiency for students to know that have been enrolled in their courses

Graduation Project   *June 2018 – August 2018*

Beirut, Lebanon

Position Held: Product Manager

❖   Compiled a three month action plan to pan out the requirements and development proposals of the project

❖   Coordinated the back-end integration that matches the entity relational module (ER) with data-driven identification tables using Unified Modeling Languages (UMLs)

❖   Constructed the Database using MYSQL server to form coherent connection between all the tables.

❖   Managed the development of the archiving system using CSS, JavaScript, and PHP to facilitate users to find specific data using keywords created by the users to save up storage space by linking actual file and archived file

❖   Initiated a testing phase by simulating user information such as files, images, and videos as archived files. That lead to the succession of search optimization process in locating the user's archived files

PROJECTS ACCOMPLISHED

❖   2020-2021   Enhancing Fiber-Optic Network at the Middle East Airlines

❖   2019   Business Analyst by Coordinating between the Customer and the Programmer
