WORK EXPERIENCE

Quality Assurance

One More Multiverse   March 2022 - Present

- Was part of 4 game releases including Blades in The Dark, 5e, Yazeba's Bed & Breakfast and Vanilla.
- Follow and execute test plan and report all issues in a fully detailed ticket format.
- Write test plans that should cover up all features.
- Triage all issues found by priority.
- Tested the product across different platforms (macOS, Windows, IOS).

Asset Manager

One More Multiverse   August 2022 - Present

- Make sure that all our assets could reach our users and dividing them into their respective categories.
- Supervise and create plans for the team to follow during our projects.
- Communicate with artists to gather all assets and stay up to date with all the art we have in order to upload and fix any bugged ones.

FullStack Intern

Let'sGrant S.A.L.   June 2020 - October 2020

- Rigorous training on modern web design & development technologies and techniques.
- Worked on several real world projects for new startups.
- Built & hosted a fullstack loaning platform web app for the company.
- Used HTML, CSS, JavaScript and their corresponding libraries and frameworks to develop the front end of each application.
- Used MongoDB as the Database of each of the Web Applications.
- Used NodeJS as the scripting language of each of the Web Applications.
- Used ExpressJS as the server of each of the Web Applications.

PROJECTS

Unity Games
- Created multiple small projects including a flappy bird clone, a PvP tower defense with AI and powerups, and a story driven puzzle solver.

Android Mobile Apps
- Created multiple small android mobile applications following material design guidelines.
- Designed & Developed UniKit, a custom redesign of a product trading app for students.
- Designed the app design using Figma.

AllUnid online trading platform
- Designed a modern online product trading platform for students who can't afford new products.
- Developed the frontend using ReactJS.
- Designed & implemented a MongoDB database to store user and items info.
- Implemented user registration, authentication & authorization, JWT tokens & sessions.

Hotel Database Management System
- Designed a mock Hotel Database Management System.
- Built the ER Diagram using Microsoft Visio and Developed the database using OracleSQL.
