BSE (Bachelor of Science in Engineering) in Computer Systems Engineering   Expected Graduation: **May 2025**

SKILLS

Programming Languages – Javascript, CSS, HTML, Python, Java, Dart
Technologies – Node, Electron, React, Axios, Selenium, LibGDX, Flutter
Operating Systems – Windows, Android

JOB EXPERIENCE

YouTube Graphic Designer   **Jan 2022-Apr 2022**
Arizona State University
- Designed assets for the UASP (University Academic Success Programs) YouTube Channel using Adobe Photoshop and Illustrator
- Arranged animation keyframes on Adobe After Effects for the assets needed for the channel
- Advised the team on the design theme for our videos to achieve congruence with ASU's brand guide
- Oversaw the cinematography for the new Afterclass'd Companion series and shot the 1st episode over a period of 2 days

PROJECTS

Checkout Automation Bot   **2021-Present**
- Developed a program in Node and Selenium that can automatically acquire limited products on web releases
- Sold it to 23 users in the UAE so they could run it and test it on various releases
- Assisted my users in getting over 100 consoles and sneakers which were all later resold at a profit

Cruise Mobile Application   **2020-Present**
- Wrote an application with Flutter that allows yacht owners to rent out their asset to users
- Implemented a Realtime Firebase database for the login process and to store user information
- Achieved a 2-week turnaround rate for writing the mobile applications for the renters and the hosts

Clothing Brand, Beirut, Lebanon   ***Jan 2020-July 2021***
- Bought tee samples at wholesale price then took them to a screen printer to create over 50 tee-shirts
- Produced a promotional video which reached 1500 people on Instagram on the initial release
- Sold all the inventory of my product at a profit margin of 200%

Streetwear Business, Beirut, Lebanon   ***Jan 2018-July 2021***
- Sourced exclusive streetwear apparel and sneakers locally and overseas and resold them with a high profit margin
- Sold over 20 products in total ranging from sneakers, hoodies, and tee-shirts with gross revenue of over $7000
- Nurtured marketable skills in leadership, and public speaking by managing a social group for buyers and sellers comprising 200+ members

LEADERSHIP

Team Participant at MIT Lebanon Challenge   **June 2020**
- Worked in a team on the idea of a platform that would allow local artisans to market and sell their products online
- Conferred with many mentors to receive feedback on the business model and the software development
- Pitched the idea to several judges on Zoom

Engineering Youth Summer Program participant at the American University of Beirut   **July 2019**
- Partook in a training camp centered around technical, entrepreneurship and soft skills
- Expanded my teamwork skills and created a solution to gender inequalities in the work sector
- Reinforced my sociability by pitching to an array of professional judges and fields experts at the end of the event

AWARDS & ACHIEVEMENTS

Best Sustainability Hack at Sunhacks 2021
Recipient of "New American University Scholarship ASU"
2nd place Winner at LAU's Computing Summer Camp in Python   **August 2020**

LANGUAGES

English, French, Arabic
