Employment

Front_end Developer Intern   **Sep 2023 - Oct 2023**

HexaPi Tech

I contributed to the development of the Tabiby platform, an existing website, as part of a collaborative team. React served as the front-end library, complemented by Bootstrap and Material UI for the design. I played a key role in implementing multi-language support for the website, and data fetching was using Axios.

Front_end Developer Intern   **May 2022 - Jul 2022**

DAS360

I initiated my learning journey with the Next.js framework and Tailwind CSS by building a single-page website. I took tasks to develop the front-end of various websites, both collaboratively as a team member and independently. Also, I implemented a multi-language website using i18next and enhanced Search Engine Optimization (SEO) through the utilization of the Lighthouse tool

EDUCATION

Computer Science   **Oct 2022 - Present**

Lebanese International University

Sophomore in Computer Science pursuing a Bachelor's degree. My coursework has provided knowledge in areas such as programming, database systems and networking

Full Stack Web Development   **Nov 2021 - Oct 2022**

Lebanese International University

- Back-end (NodeJs, MongoDB, Express.Js, Laravel, PHP, SQL)
- Front-end (HTML, CSS, JavaScript, React, Bootstrap)
- Server Management (LAMP Stack, Linux)
- Project Management (AGILE Methodology)
- Content Management System (WordPress)

PROJECTS

Missed & Found   **Aug 2022**

Codi_tech

I developed a full-stack website utilizing a technology stack that included Next.js for the frontend, Laravel for the backend, and incorporated Tailwind CSS for styling. MySQL was the database management system

Rose Pads   **May 2022**

Codi_tech

Built a startup's blog website using WordPress for easy content creation and a great user experience. The site helps the company share insights and connect with its audience effectively

Portfolio With Dashboard   **Feb 2022**

Codi_tech

Built a full-stack portfolio with a dashboard using the MERN stack (MongoDB, Express.js, React, Node.js)
