BACCALAUREATE CERTIFICATE OF SECONDARY EDUCATION**

Life Science graduate

EXPERIENCE

2022 - Present

DATA ENTRY SPECIALIST AND APP TESTER AT NUMU MARKET

PROJECTS

Pet Adopt

My first website is a pet shelter that's made for pet adoption. It includes about 5 pages all of which were built using HTML5 and designed using CSS.

Some areas in the website such as the functional Donate and Adopt pages are Javascript and PHP interactive. I also created a database management system using MySQL to store adoption-related data.

The adoption process is simple, the users get to pick whatever pet they would like to adopt from the adoption page, leading them to fill an obligatory form which later will be reviewed by the shelter to accept/reject the adoption process.

PROGRAMMING SKILLS

HTML, CSS, PHP, Javascript, Java, MySQL, C++(basic)

GENERAL SKILLS

Microsoft Word, Microsoft Excel, Microsoft PowerPoint, data-entry, problem solving, teamwork, research skills.

LANGUAGES

Fluent in both English and Arabic.

CERTIFICATIONS

IC3 Digital Literacy Certification

Having demonstrated basic computer hardware, software, internet knowledge and skills.
