- Developing a full-stack web application
- The application covers employee management, leave requests, and employee expenses and will involve analyzing, researching, and developing using Angular and Java.
- Skills: Java Spring Boot, Angular, SQL.

---

## PROJECTS

### Krypto

June 2023

- Developed and launched Krypto, a real-time cryptocurrency web application. using React and Tailwind CSS.
- Implemented features such as real-time data integration, and detailed cryptocurrency information.
- Integrated with reputable cryptocurrency APIs to fetch real-time.
- Designed a clean and intuitive user interface with a responsive layout for a seamless user experience across devices.
- Hosted at: <https://krypto-wassimchmeis.vercel.app/>
- GitHub Link: <https://github.com/WassimChmeis/crypto-currency-app>

### React Portfolio

May 2023

- Developed a portfolio web app using React and Tailwind CSS
- The app showcases my work as a React front-end developer
- The app includes projects that I have worked on, as well as my skills and experience
- App Hosted at: <https://wassimchmeiss.vercel.app/>
- GitHub Link: <https://github.com/WassimChmeis/react-website-portfolio>

### To-do list Project with my personal profile details.

September 2022

- It Has a back-end (Server) developed using Node.js and Express.js As a framework.
- The Server connected with a database implemented using NoSQL(MongoDB), and Mongoose as a framework.
- Fully responsive website application, compatible with desktops, mobiles, and tablets.
- The Application was made to prove my acquired skills listed above. Users are able to sign in and create their own To-Do-List
- GitHub Link: <https://github.com/WassimChmeis/To-do-list>

### Final Year Project: Gym Management System

Feb 2022- Jun 2022

- Used Java, PHP, and MySQL to implement an Android application to manage gym trainees and coaches
- Created a database using SQL that was connected to the application
- Implemented a fully interactive system where trainees can sign in, register in plans, and choose their coaches, and coaches can manage their athletes.
- GitHub Link: <https://github.com/jawadamer11/Jawad-Wassim>

**Online Shopping Store Website**

Dec 2020

- Used PHP, HTML, CSS, and JavaScript to implement a website for online shopping.
- Implemented a login and signup page for old and new customers.
- Connected the website backend to a database where customers' information is saved.

**Programmed Vending machine Microcontroller**

Nov 2020

- Used Assembly language and Proteus to design and implement the necessary code for the vending machine.

**Android App: online store for music instruments**

Nov 2020

- Used PHP, Java, and Android Studio to implement an application for online shopping.
- Implemented a login and signup activity for old and new customers.
