Weam Haleemi

Software Engineer

PROFILE

Software Engineer with expertise in Creating Robust Backend Systems in .Net core and interested in Software Architecture and System Design.

EDUCATION

LEBANESE UNIVERSITY— *BS in Computer Science*

OCTOBER 2022

PROFESSIONAL EXPERIENCE

Backend Developer -Gen X Management Partners-Aperture(August 2023-Present) | Beirut-Lebanon

-Led the creation of the Product Microservice for the Insurance-Powerhouse Project, leveraging MongoDb for dynamic data persistence and seamlessly integrating APIs through gRPC and REST protocols in .Net Core Web Api.

-Crafted the infrastructure and implementation of a hosted service facilitating periodic data synchronization between Solr Search Engine and SQL/MongoDb databases, enhancing data accessibility and performance.

-Developed the Decision Tree and Rate Table module for the Insurance PowerHouse project, facilitating dynamic mathematical formula creation and Insurance Rate Calculations.

- Implemented Event Driven Architecture between microservices through RabbitMq.

FullStack Developer -Intalio/EverteamGS (January 2023-August 2023) | Beirut-Lebanon (Remotely for Qatar)

-Designed clean, RESTful APIs using CQRS and Entity Framework in .Net Core

-Implemented custom Form.io JavaScript code for enhanced user experiences

-Crafted workflow designs utilizing C# (Intalio Case) for streamlined processes

-Created a tool to read Http links from an excel file and migrate the files to sharepoint

Software Engineer-Aliston Consulting/Cirrus Shield (October 2022-January 2023) | Beirut - Lebanon

Created a Teacher's Portal using .Net Core Razor, acquiring data from Cirrus Shield API and creating unique QR codes for students

TECHNICAL SKILLS

Programming Languages: C#, Java, HTML5, CSS, JavaScript, C

Database Systems // MSSQL, Entity Framework, MongoDb

Frameworks .Net Core (Web Api, MVC, Razor Pages) ,Form.IO

Technological Tools : SolR, RabbitMQ, Elastic Search, Hangfire, gRPC, REST

Collaboration Software: Azure Devops, Slack, Teams
