## SUMMARY

---

Computer Engineer Undergraduate at Beirut Arab University. I am a motivated person who is always willing to learn new skills in the field of development and programming. I am also a hardworking person who is always ready and determined to finish whatever task I have. I relish new challenges and I am always on the lookout for more. I will be graduating by the end of 2022.

## EDUCATION

---

**Beirut Arab University**

2018 - Present

*Bachelor of Computer Engineering*

## TECHNICAL SKILLS

---

**Languages:** C, C++, C#, CSS, HTML, JavaScript, Java, Python, MySQL

**Software & Tools:** Visual Studio, Visual Studio Code, Anaconda, Matlab, PyCharm, PhpStorm, Unity, Access

## PROJECTS (ALL AVAILABLE IN GITHUB)

---

### Gaming Store Website

- Project done for Web Development Course.
- This is a gaming store website which allows users to buy all the gaming items they need.

### Network Mini-game

- Project done for Computer Networks course.
- This is a mini-game in which an attacker sends "ATTACK" message to a receiver. This message is encrypted and needs to bypass a defender who has to decrypt it and change the contents of the message. If the message is received as is, the attacker wins. If not, the defender wins.

### iVOTE

- Project done for Software Engineering Course.
- This is an online voting website in which users can check the candidates for the election. They can see their campaign goals and choose which candidate to vote for.

## WORK EXPERIENCE

---

**Tripntap, Lebanon, Remote**

November 2021 - December 2021 Internship

- I learned how to develop a Three Tier Architecture in a .Net Framework using C# and Visual Studio. I learned the concept of each layer and how to develop them, and I improved my skills further in C#.

## INTERESTS AND HOBBIES

---

- I love playing sports
- I like reading articles and watching videos about the newest inventions and advancements in technology.
- I am interested in writing football articles as a hobby in the future.
