PROJECTS AND RESEARCH SUBJECTS

Design of Engineering Experiments (stain removal) – Self-driving car – System simulation and analysis (restaurant) – Facility management (supermarket) – Marble factory – PLC (bread stacker system) - Economical study for purchase of machines – Noise pollution – Injection molding of plastic – ISO 9001 – OSHAS 18001.
Capstone (Senior) project: facility layout analysis – material handling – queuing systems

CERTIFICATIONS

- Introduction to User Experience Design course, Georgia Institute of Technology, July 2022
- Circular Economy – Sustainable materials Management course, Lund University, May 2022
- Student member at the ''Institute of Industrial and Systems Engineers'', 2019-2021
- Experience certificate: 1-month training at ''iConsult engineering services'' in PID control applications, September 2019
- Certification in Adobe Illustrator, Global University, July 2019
- Certification for assisting in Beirut marathon, Blom Bank, November 2018
- Certification for assisting in a summer chess tournament, September 2018
- Certification in MS word-excel-PowerPoint, September 2018
