PROFILE SUMMARY:

I am very passionate about coding. I work well in a team and individually. I am proficient in JavaScript and React as a Front-end developer and in NodeJs Express and Laravel as a Back-end developer. I aim to develop myself and explore new fields as I am a fast-paced learner.

WORK EXPERIENCE:

Codi-Tech | Beirut, Lebanon

Full-Stack Web Developer | March 2022 - October 2022

- Establishing projects using different Back-end languages including NodeJs Express, PHP, Laravel, and SQL.
- Designing the Front-end of websites using JavaScript, React, and React Native.
- Managing the Server using LAMP Stack and Linux.
- Developing project management skills while applying the AGILE Methodology such as leading sprints.
- Operating WordPress as the Content Management System.
- Creating different types of websites and applications.

Freelancer | Beirut, Lebanon

Full-Stack Web Developer | November 2022 - present

- Establishing projects using Back-end languages including NodeJs Express.
- Designing the Front-end of websites using JavaScript, and React.
- Creating different types of websites including Portfolio, and E-commerce.

PROJECTS:

Pharmacy website | MERN Stack

- The website is used for customers to view different brands and products present in the pharmacy.
- The customer can also view the services provided by the pharmacy.

Event Planning | MERN Stack

- This project is a MERN Stack app.
- The website is used for customers to view different events that are happening.
- The customer can also view past events that happened before.
- the customer can reserve a ticket for an event in case they want to join.

ERP Project | ReactJs & Laravel

- This app was created using ReactJS for the front-end and Laravel for the back-end MySQL for the database.
- The app is a dashboard for admins and super-admin where the super-admins can add admins only.
- The admins can edit, add, and delete profiles.
- The dashboard is used to check the employees' projects, teams, and KPIs.
- It also generates reports for each employee in order to specific KPIs in the form of a bar chart.

EDUCATION:

Matn University College | Beirut, Lebanon | Degree Attained in 2020

- Bachelor of Science in Computer Science and Mechatronics | Graduated Awarded as the first in the department.
- Participated in several academic activities and competitions including the Robotics club.

SKILLS:

- Proficient in Self-learning, Problem Solving, Leadership, and TeamWork skills.
- Good knowledge in Python Django Rest Framework.
- Expert in using Git.
- Experience in Dockerizing a website.
- Languages: Fluent in Arabic and English.
