CAREER OBJECTIVE

Web developer with an eye for details and the will to continuously improve. Experienced in full-stack development using the MERN/MEAN stack, along with other technologies that enables me to create powerful and unique web applications

WORK EXPERIENCE

React Developer (remote)
Anchor Ventures Holding

📅 October 2022 - May 2023   📍 Sydney, Austraila

- Took on responsibilities such as helping with developing user interfaces for clients, maintaining website APIs and developed endpoints to address certain use cases.
- Used design tools such as Figma to create the website designs. Next then translated the design into a full-fledged ReactJS frontend web application.
- Incorporated libraries such as Redux, React-router, Chakra-UI, Material UI, Bootstrap and frameworks as NextJS to develop powerful and faster web applications with more responsive designs.
- Was exposed to different software development practices and methodologies such as Agile web development and code versioning tools like Git that helps facilitate the development process.

Product Manager (remote)
APPIPE for Innovation

📅 July 2022- October 2022   📍 Rome, Italy

- Monitored tutors performance on the platform to ensure a better customer experience.
- Reported feedback weekly from students to top management for further insight and to act accordingly.
- Provided monthly feedback on tutors, issues faced and suggestions to be reviewed.
- Suggested new approaches to dealing with recurring issues and worked to implement solutions to existing problems.

Web Developer (remote)
LetsGrowMore

📅 July 2022 - September 2022   📍 Jasra, India

- Worked on several web technologies such as: HTML, CSS, and vanilla JavaScript, ReactJS, NodeJS/ExpressJS, MongoDB/MySQL, Angular/Typescript
- Developed different web applications such as landing pages, Student Management Database Web Systems, and improved existing designs.
- Implemented ReactJS for a client's application which helped optimize their site increasing its loading speed with 10%.
- Built mock designs and wire frames for landing pages for 5 different product concepts.
