### CAREER SUMMARY:

I describe myself as a quick learner, highly self-motivated person, detail oriented and focused on delivering high quality work. I've got the challenging personality that helps me achieve what I aim for and I always love to experience new fields.

### WORK EXPERIENCE:

#### Codi Tech

Full Stack Web Development Trainee March 2022 - Present

- Developing Web applications using different frameworks and languages.
- Developing Backend, Frontend and Database.
- Using different technologies such as MERN(MongoDB, ExpressJS, ReactJS, and NodeJS), Laravel framework, MYSSQL, Docker.
- Using git and gitlab for collaborative teamwork.
- Using Linux operating system.
- Undergoing project pre-production such as project requirements, briefs, wireframes, user stories, and database schema.
- Building WordPress websites.
- Applying Agile methodology in each project such as regular team meetings, daily reports and sprint planning .

### RELEVANT PROJECTS:

#### 1-LEARNING MANAGEMENT SYSTEM (Laravel, ReactJS, MySQL)

-The main objective of Learning Management Systems is to enhance the learning process. The Learning Management System developed not only delivers content, but also handles adding admins, classes, sections and students, taking student attendances, tracking, and reporting results and graphs.

#### 2-MERN PROJECT FOR PHARMASAVE COMPANY (NodeJS, ReactJS, MongoDB, ExpressJS)

-A website for PharmaSave, a company that supplies medical equipment .  
-The aim for the website is to mainly provide customers the ability to see all the brands and products provided with their details. This website will provide the customers the ability to contact the company owners.

#### 3-WEATHER API (React JS)
