Summary

A Web Developer with 1+ experience in developing frontend applications that considers the flexible and simple experience for users. I'm highly curious about benefiting from new technologies, eager to learn continuously, and supportive in working collaboratively with teammates, along with challenging myself about different methodologies of implementing new ideas.

Work experience

• Countries App
Angular APP

- developed front-end web application using HTML, CSS, Typescript, Angular framework, NodeJS, Excel.
- Used version control tools (GitHub) appropriately depending on the task at hand.
- Ensured that the code is running smoothly and modifiable.
- I used an existing external API to fetch the countries data and then store them in an excel file .

• Food App   2021 – 2022
With Udemy

- implemented front-end web application using HTML, CSS, JavaScript, ReactJs to meet business requirements.
- Used version control tools (GitHub) appropriately depending on the task at hand.
- Ensured that the code is running smoothly and modifiable.
- deployed the backend on the Heroku website and linked it to the files on GitHub page.

• One Project: 2021 – 2022
My Website

- Designed and implemented front-end web application using HTML, CSS, JavaScript to meet business requirements.
- Used version control tools (GitHub) appropriately depending on the task at hand.
- Ensured that the code is running smoothly and modifiable.
- deployed the backend on the Heroku website and linked it to the files on GitHub page.
