## Projects

### Learn Me | React Native, NodeJS, ExpressJS, MongoDB | [Video](#)

"Learn me" is an educational platform that aims to create new possibilities for people and organizations everywhere.

It features many programming courses, At the end of the program, students who pass their final exams with 80% or greater will be awarded a certificate from "Learn me".

### LMS | ReactJS, Laravel, Mysql | <https://codi-lms.netlify.app/>

This Web application gives access to SuperAdmin to manage admins, classes, students & sections (CRUD Operations). It also generates reports for each class section & each student. The admins can take students' attendance in each class with an editable attendance option. Laravel was used for the Backend and React was for the Frontend. This project was done in teams using the Agile methodology.

### Cezar Project | ReactJS, NodeJS, ExpressJS, MongoDB | <http://cezar.onrender.com/>

This Web application is used for branding and advertisement. Used MERN stack to build a full stack application

### Socket online users | ReactJS, NodeJS, ExpressJS, Socket IO | <https://socket-nour.herokuapp.com/>

Server for online users using socket.

### I's art work | Wordpress E-commerce) | <http://isartwork.tk/>

E-commerce web app for arts and crafts supplies with an add to cart feature. Also, the user has the capability to purchase products via Whatsapp.

### Khala | ReactJS, NodeJS, ExpressJS, MongoDB | <https://khala.onrender.com/>

This Web application is used for branding and advertisement. Used MERN stack to build a full stack application

### PortFolio | ReactJS, NodeJS, ExpressJS, MongoDB | <https://ibrahimserhane.netlify.app/>

The user can login to a dashboard and perform CRUD operations. This Web application is used for branding and advertisement. Used MERN stack to build a full stack application

### Mercedes 2022 | JavaScript, CSS, HTML | <https://mercedes-2022.netlify.app/>

UI / UX
