Summary

A reliable fresh computer engineer student seeking challenging position where I can apply my present experience, enhance my professional skills, capabilities and knowledge.

Providing a dynamic character with top-notch programming, android developing and java programming.

Focused on going above and beyond, willing to learn more and develop my skills to get more experience about concerning my major.

Experience

Android Developer

Senior Project

2022 - Present (7 months +)

Built mobile application called Blood Donation App as a senior Project for university using Android Studio connected to Database system.

Including queries to connect android studio with the database. Use of location of the patient requested blood and his phone number to directly call him by the donor.

An admin page to check, manage work and submitting blood requests and whether the requested blood is accomplished or not.

Tutor

Freelancer

2020 - Present (2 years 7 months +)

- . Expanding my theoretical knowledge by helping students with their computer engineering courses.
- . Developing technical and engineering skills through observing student's projects.
- . Managing and developing android applications using android studio.
