Mohamad Kalawoun

Nationality : Lebanese

Email: mohamad842000@gmail.com

Mobile: +961 76 502544

Date of birth : 8/April/2000

EXPERIENCE

- Software Developer at Mobinets :   Started in 1/March/2022 – **Present**

  Main Tasks:

  1. Develop client/server applications in Java using different technologies/frameworks: Hibernate, Spring, Oracle DB, JDBC, Vaadin 14+, HTML/CSS, SVN, Flowable
  2. Build Web Services (including SOAP/REST) and test them using SOAP UI
  3. Build, create and design BPMN workflows using Flowable.
  4. Liaise with software developers, software architects and project managers in order to design, develop and maintain applications.
  5. Provide support during the acceptance tests and maintenance phase. Support activities ranges from level 1 (answering calls/emails), level 2 (identifying the problem), to level 3 (proposing and implementing solution).
  6. Software Integration Developer:
       1. Implement Soap APIs used by external system.
       2. Communicate with external soap/Rest APIs using flowable.
  7. Technical Support:
       I. Explain frameworks and tools to new teammates.
       II. Explain and assign tasks to teammates on specific project.
       III. Review teammates code, implementation before commit.
       IV. Support teammates when facing new, unclear exceptions.

- Software Developer Internship at Mobinets :

  Started in 1/September/2021 –> Ended in 28/February/2022 (**6 months**)

Main Tasks:

1. Develop new or customize existing software modules (mainly in Java 1.8- Spring - Spring Boot - oracle SQL - Vaadin Environment) as per project needs.
2. Getting involved in all software project phases including, software analysis and design, coding, testing and all their related documentation (e.g. functional requirement specification, design specification, validation and acceptance test plans, user manual).
3. Object oriented analysis and design using common design patterns.
4. Act as independent tester (end-end solutions) for newly developed modules or patches.

EDUCATION

Computer Science in CNAM University

Description

- Started in 2018
- Passed in all required courses, and Currently, I am waiting for my certificate General bachelor's degree in computer science (*Licence générale Sciences technologies santé mention informatique LG02501A*) to be certified by the main university headquarter in France.

Technical Competencies

(learned and used in real projects required from some uni courses || internship || work)

- Java - Java EE
- Spring Boot
- JPA – JDBC – Hibernate
- Databases (concepts, Oracle SQL scripts)
- Php

- JavaScript
- Python
- Spring
- Swing
- JGoodies
- Vaadin (versions : 14 - 8 - 21)
- Web services (SOAP/REST api's)
- Maven
- version control : SVN , Git
- Groovy
- Flowable (bpmn & dmn)
- Advanced object-oriented knowledge
- jQuery
- Html - CSS – Bootstrap
- MySQL
- Json – Ajax – XML
- C
- RMI
- Jenkins
- Flutter   (basics)
- React JS (basics)
- Vue JS   (basics)

Github profile : https://github.com/mohamadkalaoun

SKILLS

- *Languages*: Arabic (Native), English , French(Intermediate)
- *Technical Skills*: Proficiency in Adobe Premier Pro , Photoshop ,PicsArt , Canva , Microsoft Office , Discord …
- SOFT SKILLS: Quick Learner , Problem Solving ,Teamwork/Collaboration , Work under pressure
- *Knowledge in adobe XD , zapier , audacity , obs …*

HOBBIES

- Sports : Hiking , Basketball , ping pong
- Interested in crypto – decentralization – web3 - metaverse and I like read , watch all the news.
