ABOUT ME

As a highly motivated computer science student at the Lebanese American University, I am eager to gain practical experience and hone my programming skills in a professional setting. I am a dedicated and ambitious programmer who is confident in my ability to deliver exceptional results through strong teamwork and excellent time management skills.

EXPERIENCE

LAB ASSISTANT 2022

Lebanese American University

- As a part-time teacher assistant at the Lebanese American University, I have the opportunity to assist the instructor of the Object and Data Abstraction course in a variety of ways.
- This may include leading review sessions, grading assignments and exams, providing feedback and guidance to students, and contributing to the development of course materials.
- Working as a teacher assistant allows me to gain valuable teaching experience, improve my subject knowledge, and help students succeed in their studies.

EDUCATION

BS IN Computer Science 2020-2023

Lebanese American University | Beirut, Lebanon

- I am currently completing my Bachelor's degree in *Computer Science* at the *Lebanese American University*.
- CGPA: 3.97

SKILLS

- ● ● Java, C, Python, SQL, PHP, JavaScript, HTML, CSS, jQuery, JSON, MongoDB
- ● Cuda C, OpenMp, MPI, Flutter
- ● ● Microsoft Word, Microsoft Excel, Microsoft PowerPoint

Time management, Problem-solving, Communication, Project Management, and Teamwork skills

Languages

- Arabic (native)
- English (Professional working proficiency)

PROJECTS

CREATING A HOTEL'S WEBSITE

- Developed a hotel website from scratch, using a variety of technologies including HTML, CSS, JavaScript, jQuery, PHP, MongoDB, and JSON.
- Worked on both the frontend and backend components of the website, designing the layout and user interface, implementing interactive features, setting up a server, storing and managing data, and implementing server-side logic and functionality.

CREATING A SCHOOL DATABASE

- Designed and implemented a database for a school using SQL (Oracle 11g Express edition)
- The database was designed to efficiently store and manage various types of school-related data, including students and teachers records, staff information, course schedules, and more.
- The project involved designing and managing tables in a database using SQL queries and commands. This included creating new tables, inputting data, updating and deleting records, and performing other tasks as necessary.

CREATING A HOTEL MANAGEMENT SYSTEM

- This project involved developing a hotel management system software from scratch. It involved both software implementation and testing, as well as software design and requirements.

CREATING A SIMPLE RISC PROCESSOR

- Designed and implemented a simple RISC processor using JAVA programming language

ACHIEVEMENTS

Awards

- 6th place in the international competition "Quanta" in the category of mental abilities in India, November 2018
- 2nd place in Pre-College Mentoring Program project at AUB, October 2019

Volunteer Activities

- Collecting blood donations for Shifaa NGO
- Organizing activities for children in schools in collaboration with Bordless NGO
- Tutoring sessions in different subjects
