ABOUT ME

As a computer science undergraduate student at Lebanese American University, I am passionate about using technology to solve real-world problems. I have a strong foundation in programming languages such as Java, C and Python, and have gained experience in web development through coursework. I am currently seeking an internship opportunity where I can apply my skills and learn from industry professionals. I am a quick learner and thrive in collaborative environments, and I am excited to contribute to a team and make a positive impact. I am confident that my passion and skills make me a strong candidate for an internship in the field of computer science. I am eager to take on new challenges and make the most of this opportunity. Thank you for considering my profile.

EXPERIENCE

LAB ASSISTANT 2022
Lebanese American University

- As a teacher assistant at the Lebanese American University, I am responsible for providing support to the instructor in the Object and Data Abstraction course.
- This includes leading review sessions and assisting students with course material.
- In this part-time role, I work closely with the instructor to ensure the course is running smoothly and that all students are understanding the material. I also have the opportunity to interact with students and help them with any challenges they may be facing in the course.
- Through this role, I am gaining valuable teaching experience and developing my skills in communicating complex concepts to students.

EDUCATION

BS IN COMPUTER SCIENCE 2020-2023
Lebanese American University | Beirut, Lebanon

- I am currently pursuing a Bachelor of Science degree in *Computer Science* at the *Lebanese American University*.
- CGPA: 3.94

PROJECTS

CREATING A HOTEL'S WEBSITE

- Developed a hotel website from scratch, using a variety of technologies including HTML, CSS, JavaScript, jQuery, PHP, MongoDB, and JSON.
- Worked on both the frontend and backend components of the website, designing the layout and user interface, implementing interactive features, setting up a server, storing and managing data, and implementing server-side logic and functionality.

CREATING A HOTEL'S MANAGEMENT SYSTEM

- This project involved developing a hotel management system software from scratch. It involved both software implementation and testing, as well as software design and requirements.

CREATING A SCHOOL DATABASE

- This project involved designing and implementing a database for a school using SQL (Oracle 11g Express edition).
- The database was designed to store and manage a wide range of school-related data, including student and teacher records, staff information, course schedules, and more.
- The project involved creating tables, inputting data, updating and deleting records, and performing other tasks as needed using SQL queries and commands.

CREATING A SIMPLE RISC PROCESSOR

- Designed and implemented a simple RISC processor using Java programming language

SKILLS

Java, Python, SQL, C, PHP, JavaScript, HTML, CSS, jQuery, JSON

Microsoft Word, Microsoft Excel, Microsoft PowerPoint

Problem-Solving, Time Management, Team Work Skills, Communication, Analytical Skills, and Project Management

Languages

- Arabic (native)
- English (Full professional proficiency)
- French (Basic)
