CAREER OBJECTIVE

A dedicated and hardworking computer engineering student at the Lebanese American University, with a strong academic background and a passion for the technology industry. Seeking an opportunity to gain hands-on experience and apply knowledge acquired in coursework to a professional setting.

PROJECTS

Guess My Number

Creator

📅 April 2021 - current

- The first project created using Html/CSS and javascript while learning javascript.
- The objective is to try and guess the random number generated between 1 and 20, with some clues if the tried number was higher or lower than the objective.

Pig game

Creator

📅 2022 - current

- Built this as my third project while learning Javascript
- The objective is to score a total score of 100 before the second player when rolling a dice, without getting a value of as it will drop your score to 0 (For more information visit the github link provided)

Hospital-Website

Creator

📅 November, 2022 - current

- Built a responsive website, using Html, CSS, Javascript and Bootstrap as the front-end tools of the website.
- Built features like log-in and sign-up, using Node js, Express js, and MySQL.
- Added feature for each user depending on whether you are a logging in as a Doctor, Nurse, Patient or others.
