PROFILE

Young and motivated undergraduate student with an intermediate knowledge in software development, capable of working on any project related to my field of study, always aiming for perfection in order to accomplish the best possible projects.

EXPERIENCE

INNOVATION AND DESIGN THINKING

LINKIT

January 2021- April 2021

Worked with a team of USJ students and Santa-Clara's students in California to discover solutions for problems in LINKIT company

WEB DEVELOPMENT INTERNSHIP

AIFIX UAE

06/2022-10/2022

- Developed user interfaces with Vue JavaScript framework, alongside the usage of bootstrap components.
- Created accessible, responsive, and functional user interfaces to allow visitors on any device to have the same perfect user experience.
- Built API integration following RESTful standards using axios to allow users to submit information by storing data in MongoDB, with cors handling and token based authentication.
- Created API REST service to handle concurrent requests on gathering and submitting information as well as handling csrf tokens for securing these APIs and also implementing the correct user roles and permissions to allow or deny access to resources.
- Create REST API with two steps authentication using Laravel.
- Make middleware using Laravel ensure that the roles are valid, role based permissions.
