**Address:** Sarafand, Lebanon

**Email:** mohammad\_khalifeh.1@hotmail.com

**Mobile:** +96170410139

## EXPERTISE SUMMARY

- Proficiency in front-end design and development such as HTML5, CSS3 and JS.
- Three years' vocational expertise in using Java OOP language to program medium size projects.
- Competent with all the JavaScript basics including ES6, Ajax, JSON and OOP where I applied them in different projects.
- Good knowledge in PHP and MySQL where I used them to develop dynamic and interactive small pharmacy websites.
- Good communication and problem solving skills which were applied in various group and own projects.
- Very good skills in using MS Office software package, including PowerPoint, Word, Visio and Excel.
- Self-directed learning skills which involve the ability to constantly developing my own programming skills.
- Fluent in Arabic, Intermediate in English.

## EDUCATION

**Licence Technique (L.T.),** Programming, 2020-2021, Al-Amal Institution of Technology (Al-Sarafand, Lebanon).

**Diplôme de Technicien Supérieur (T.S.),** Systems and Networks, 2018-2020, Al-Amal Institution of Technology (Al-Sarafand, Lebanon).

## TRAINING COURSES

**Comptia A+,** 2017-2018, *Almasar technical institute, (Lebanon).*

**CCNA Routing and Switching: Introduction to Networks,** 2018-2019, **Cisco,** (Lebanon).

## COLLEGE PROJECTS

**2019-2020**

***Network in Al Karim Medical Laboratory (KML)***

***Al-Amal Institution***

The aim of the project is to study and improve the network and network security of the Al Karim Medical Laboratory:

- Identified the main network components, including cabling, connectivity devices, security techniques, network topology, IP addressing, operating systems etc.
- Identified each of the employee's access privileges within the company's network.
- Created a 2D drawing floor plan using MS VISIO to find out how employees are distributed within the company.
- Used Packet Tracer software to simulate the configuration of Cisco routers, servers, switches etc.
- Created a network map showing all the network connectivity devices located in the company.
- Studied all the network related equipment including cabling and connectivity devices.
- Studied all the operating systems used in the company, as well as servers, IP addressing, routers etc.

**2020-2021**

***Online Shopping Website***

***Al-Amal Institution***

The aim of the project is to create an online shopping store website to sell various products:

- Created a use-case diagram to identify the interactions between the system and its actors.
- Created other diagrams including class, sequence and activities to visualise the design and functionality of the system

Currently, I am working on developing the website.

## PERSONAL PROJECTS

Constantly improving my programming skills by self-developing various clones of well-known applications:

- Developed a small Pharmacy by using HTML, CSS, JS, fetch as the front-end and PHP, MYSQL as the back-end for a client.
- Developed a website to calculate the profits and losses for my father's store using HTML, CSS, JS, fetch as the front-end and PHP, MYSQL as the back-end.

## INTERESTS

- Design and developing websites and applications.
- Socialising with friends and family.
- Walking, reading and learning languages.
