PROFESSIONAL EXPERIENCES

ASP.NET intern
Anzimaty-Beirut

08/2022 - 10/2022

*This organization is digital enablers that help organizations and brands
provide the tools to tell their story and drive business growth.*

Achievements/Tasks

- Create a multilingual website using ASP.NET that allows everyone to donate and get information about it through the services provided by it.

CI/CD intern
Bluemint.

09/2021 - 10/2021

It is an online business characterized by a website.

Achievements/Tasks

- Creating a static website from GATSBY (npm dependency)
- Creation of a project on GitLab [It's a good lab (a very modern tool)].
- Write the code from VisualStudioCode and test it in GitLab.
- Deploy the website using SURGE where SURGE is a cloud platform for server list deployment.
- Use commands to manage security when using GitLab.
- Know the basics of YAML [YAML is not a markup language] is a friendly data serialization standard for all programming languages.
- Convert YAML code to JSON.
- Encourage motivation by using INTERNET sites.

TECHNICAL SKILLS

Programming Languages : PHP, C++, C#, SQL, SQL/PL.

Web: ASP.NET, Laravel, JavaScript, HTML5, CSS3, Bootstrap4, Ajax, JSON, jQuery.

Tools: VisualStudioCode, SharpDevelop, CodeBlocks, AndroidStudio, Prolog, Microsoft Visual Studio.

Databases : MySQL, Oracle, SQL Server .

Microsoft Office: Excel, PowerPoint, Word, Access, Outlook.

PERSONAL PROJECTS

Learning Management System in PHP Laravel (2022)

- Allow administrators to manage departments and teacher information, and allow students to view their own courses.
- Let teachers know lesson lists that need to be taught using different types of content (folders, pdf, assignments, exams, etc.) and save them through virtual classrooms so that students are aware of their learning .
- Activate the discussion between the different actors of the university from a forum.
