Experienced Fullstack Developer with a strong foundation in front- and back-end development, specializing in building scalable, user-focused applications. Skilled in streamlining code and optimizing APIs for performance, I ensure that applications are not only functional but intuitive for end-users. Passionate about continuous learning and keeping up with the latest technologies.

Professional Experience

Fullstack Developer

Digital Splash — March 2023 - Sep 2024

- Built user-friendly websites from scratch to improve customer experience.
- Improved back-end APIs, making the system faster and more efficient.
- Created and maintained detailed software documentation to help with team collaboration.
- Explored new technologies to keep improving the product and stay up-to-date with trends.

Backend Developer (Startup)

Fixalign — June 2023 - July 2024

- Developed back-end solutions with Laravel, enabling smooth API integration.
- Worked directly with clients to deliver custom solutions for their needs.
- Improved user experience by listening to client feedback and updating features.

Product Developer (Startup)

Water Monster — December 2022 - December 2023

- Designed, prototyped, and tested an Arduino-based water level sensor, turning an idea into a working product.
- Provided technical support to the CEO, helping turn ideas into reliable products.
- Improved sensor design to create a stable, market-ready product.

Projects

Evently — Event Organization Web App

May 2024 - July 2024

A web application designed to streamline event management for users, providing tools for organizing and tracking events.

- Frontend: Next JS 14, Tailwind CSS
- Backend: Nodejs, GraphQL

UpDown — Elevator Application

November 2022 - December 2022

A mobile app that allows property owners to monitor elevator usage, with features to call or cancel elevator requests remotely.

- Frontend: Flutter and React.

- Backend: Laravel, MySQL

Education

- **Bachelor of Science in Computer Science,**
Lebanese University - Faculty of Science, Beirut, Lebanon
September 2019 – December 2023
- **Lebanese Baccalaureat in Life Sciences,**
Beirut, Lebanon
2017 - 2018

Training and Certifications

Fast Track to Senior, OnRamp Academy, Beirut

April 2024 – July 2024

- An intensive 12-week program aimed at preparing engineers for senior roles in digital agencies, focusing on advanced technicalb skills and project management.

Full-Stack Web Development Bootcamp, SE Factory, Beirut

August 2022 – December 2022

- Completed an intensive full-stack web development program covering cloud architecture, front- and back-end development, source control, and web application security over 14 weeks of lectures, workshops, and projects.
