Lebanon - Choueifat

FULL STACK SOFTWARE DEVELOPER

Junior software developer seeking an engaging and challenging role to apply my coding expertise, collaborate with a dynamic team, and contribute to the development of cutting-edge software solutions.

EDUCATION

Bachelor of Science in Computer Science

Lebanese International University Expected Graduation: June 2024

- Honor Dean's List Fall 2023
 - Honor Dean's List Spring 2023
 - Honor Dean's List Fall 2024
 - Major GPA: 3.59
-

WORK EXPERIENCE

Internship: Integrated Digital Solution

June 2023 - August 2023

- Designed a web application tailored for corporate meeting scheduling using ReactJS, ASP.NET core, and SQL
 - Implemented features allowing users to update/create/delete/view meetings, rooms, and employees depending on the user role (Owner, Admin or Employee)
 - Recognized for exceptional attention to detail and complete satisfaction of all project requirements.
 - Strengthened practical skills through hands-on experience, further highlighting my capacity for user-centered development.

-

RELEVANT PROJECTS

Freelance Website - FullStack Development (Currently In Development)

- Built very secure backend APIs using JWT token that checks the signature of the token.
- Designed a very efficient relational database using migration for asp.net models.
- Implemented role-based access control (RBAC) to restrict access to certain API endpoints
- Source code: <https://github.com/St-Daniel-H/LebaneseFreelanceWork>

Social Network - FullStack Development

- Successfully developed a dynamic social networking project using MongoDB, Mongoose, Express.js, Redux, and ReactJS.
- Implemented features allowing users to post content and interact with posts via likes and comments.
- Designed a flexible non-relational database
- Source code: <https://github.com/St-Daniel-H/SocialNetwork>

LIU Club House - FullStack Development

- Developed a clubs application with Flutter for the mobile front-end and PHP for the back-end, ensuring seamless integration.
 - Implemented a secure and efficient database system in PHP,
