

I am a recent graduate of Lebanese American University with a degree in Computer Science and certification as a Personal Trainer. Currently, I am employed as a full stack developer at Monty Mobile. I am now seeking new and exciting opportunities in a growing organization that can provide both career advancement and fresh challenges. With my strong organizational skills and experience in full stack development, I am confident in my ability to contribute to the success of a dynamic team.

WORK EXPERIENCE

Full Stack Developer

05/2023 – Present

Monty Mobile, Beirut, Lebanon

- Joined Monty Mobile as a Full Stack Developer, contributing to the development of innovative solutions using Node.js, Java, and other technologies.
- Leveraged the power of Node.js and its event-driven architecture to build scalable and efficient web applications.
- Utilized Java for server-side development, leveraging its robustness and versatility.
- Developed code using industry-standard IDEs, such as IntelliJ, ensuring streamlined development and debugging processes.
- Implemented RabbitMQ as a message queuing system, enabling efficient communication between microservices and enhancing application performance.
- Utilized Maven as a build automation tool and dependency management system, ensuring smooth integration and deployment of software components.
- Leveraged Postman for API development, testing, and documentation, ensuring the reliability and functionality of the developed APIs.

Software Engineer

12/2022 - 04/2023

BA Solutions, Beirut, Lebanon

- I worked as a software engineer at BAS Solutions, a software development company specializing in custom software solutions for clients across multiple industries.
- Used Agile and Kanban methodologies to manage project workflows and ensure timely delivery of software products.
- Worked with Laravel 9, a popular PHP web application framework, to develop software solutions for clients.
- Utilized the Model-View-Controller (MVC) design pattern to create scalable and maintainable codebases for large software projects.
- Collaborated with cross-functional teams, including developers, QA engineers, and project managers, to ensure project requirements were met and software products were delivered on time and on budget.
- Assisted in troubleshooting and debugging software issues in production environments.
- Stayed up to date with industry trends and emerging technologies to recommend best practices and enhance software development processes.

Software Engineer Intern

07/2022 - 11/2022

BA Solutions, Beirut, Lebanon

- Developed front-end web development skills in HTML5, CSS, jQuery, and Bootstrap, and acquired back-end development skills using PHP and SQL.
- Successfully worked on a full-stack project, implementing a movie site with 15 functional web pages and a fully functional back-end using HTML, CSS, JavaScript, jQuery, AJAX, Laravel(PHP), and MySQL.
- Demonstrated strong problem-solving and troubleshooting abilities, collaborating with the development team to resolve technical issues.
