RELEVANT EXPERIENCE

NASA – *Space Apps Challenge 2022 - Hackathon*
Website Developer, Game Tester, and Head of Social Media   *Sep 2022 – Oct 2022*

- Worked on creating a website with 4 other team members that provides a description of the Parker Space Probe's Journey around the Sun as a stylistic display to be seen prior to a game that shows the full journey around the Sun.
- Gathered and tested visual assets for the game throughout the entirety of development
- Worked with the game developer using unity on in game dialogue, colors, displays, game features.
- Put the game on the website to add visual representations of the information on the website.
- Worked on presentations of how the website and game came to be and presented it to judges along with the rest of the team.
- Outcomes:

  1-Learned how to work under pressure

  2-Learned how to work in a team environment
