Jad Salameh

Baabda,1003, Lebanon | (+961)76726381 jadsalameh1800@gmail.com

A creative web developer with a solid background in web design and development. Proficient in leveraging technologies such as React and TypeScript to create engaging and responsive websites. A proactive learner and problem-solver, I approach development challenges with enthusiasm and a commitment to delivering innovative solutions.

Experience

Pixel Path
Front-End Developer Intern | October 2023- December 2023|

- Successfully acquired proficiency in building responsive websites using React and TypeScript, implementing modern design principles. This included creating two distinct projects from the ground up.
- Utilized the Styled Components library to craft modular and visually consistent components, ensuring a seamless and cohesive design across the entire application.
- Demonstrated the ability to organize projects effectively by implementing a well-structured approach to pages and components. This ensured scalability, maintainability, and ease of collaboration within the development team.
- Implemented robust routing mechanisms to seamlessly connect different sections of the website, providing users with a smooth and intuitive navigation experience.
- Gained proficiency in version control using Git, creating branches, committing code, and making pull requests. Developed a solid understanding of the collaborative development process, including merging code changes and resolving conflicts.

Education

ANTONINE UNIVERSITY— BACHELOR OF TECHNOLOGY IN COMPUTER SCIENCE
| OCTOBER 2019 - 2023 |

NOUVELLE ECOLE DES FRERES — Lebanese Baccalaureate
| 2019 |

Skills & Abilities
