SUMMARY

Full-Stack Developer with 2+ years of experience building user-friendly web applications. Adept at both front-end and back-end development, I leverage my full-stack expertise to translate complex ideas into intuitive and functional solutions. I thrive in fast-paced environments, collaborating effectively to deliver projects on time and within budget.

EXPERIENCE

Frontend Developer

Logicsfield

June 2023 – Present, Beirut

- Spearheaded UI development using React.js, specializing in advanced features, best practices, and common design patterns. .
- Collaborated effectively with cross-functional teams (backend developers, UX designers, product managers) to deliver high-quality, well-integrated features.
- Mentored junior developers and fostered a collaborative development environment, leading to increased team productivity.
- Engineered a full-stack solution that automated business processes across sales, inventory, and customer service, resulting in a 30% rise in customer satisfaction rates.
- Led performance and scalability improvements by optimizing code, implementing algorithm enhancements, and fostering collaboration with the development team.
- Utilized Git for efficient version control and Jira to streamline project management.

Full Stack Developer

Codi Tech

November 2022 – June 2023, Beirut

- Demonstrated versatility by contributing to various back-end projects utilizing a range of languages and frameworks, including Node.js (Express), PHP (Laravel), and MariaDB.
- Crafted user-centric interfaces for web applications using JavaScript libraries and frameworks like React, React Native, and Bootstrap.
- Successfully implemented the Agile methodology to plan, organize, and manage project workflow, ensuring efficient delivery.
- WordPress CMS experience for website creation and content management.
- Developed an LMS leveraging the LAMP stack (Linux, Apache, MySQL, PHP) alongside React.js, React Native, and Material UI (MUI) for a seamless user experience.
- Built two e-commerce applications from the ground up, utilizing MongoDB for data storage, Express.js for server-side functionality, React.js for the frontend, Node.js for runtime environment, and Redux for state management.

Website Developemnt

Freelance

August 2021 – January 2023, Beirut

- Developed and maintained relationships with clients.
- Successfully completed all projects on time.
- Worked independently and as part of a team to achieve project goals.
- Demonstrated strong problem-solving and analytical skills.
- Effectively communicated with clients and team members to gather requirements and provide updates.
