SUMMARY

Full Stack Developer specializing in Web Development and Flutter for mobile apps. Skilled in building high-quality applications focused on efficiency and user experience. Driven to create solutions that align with business goals. Seeking opportunities to leverage my expertise in dynamic, collaborative environments.

EXPERIENCE

Full Stack Web Developer | Internship, Zidyia Library   Sep 2024 – Dec 2024 | Remote
- Developed a MERN stack application using React, Node.js, Express, MongoDB, and Vite.
- Integrated AWS S3 for file storage, Stripe for payments, and Socket for real-time features.
- Automated email functionality using Nodemailer.
- Designed a responsive UI based on Figma, ensuring cross-browser compatibility.
- Prioritized performance, security, and accessibility.

Backend Developer | Full Time, Dekode   Jan 2023 – Jan 2024 | Remote
- Developed and maintained backend services using PHP.
- Optimized MySQL database schemas and wrote efficient queries to improve performance.
- Collaborated with cross-functional teams for seamless frontend and backend integration.
- Conducted API testing using Postman.
- Managed version control with Git and deployed applications on various servers.

PROJECTS

Personal Portfolio, (Self-Project) 🔗   Dec 2024 – Dec 2024
- A personal portfolio website showcasing projects, skills, and experience in web development and mobile app development.
- Built with React.js, Vite, TailwindCSS, Framer Motion for animation and EmailJS to send emails.
- Features include a responsive design, interactive animations, and easy navigation.

Zidyia Library, (ESA Coding Lab & Zidyia Library)   Sep 2024 – Dec 2024
- A library repository is a collection of books and reference materials that users utilize for accessing books and citations with admin dashboard for super and tenant admins.
- Built with MongoDB, Express.js, React.js, TypeScript, TailwindCSS, Redux Toolkit.
- Integrated AWS S3 for media files storage, Nodemailer for sending email, Stripe for payment and socket for notifications.

Learnify, (ESA Coding Lab) 🔗   Jul 2024 – Aug 2024
- An education platform that enables users to explore and share courses, improving their learning experience by offering a centralized platform for diverse educational resources.
- Built using MongoDB, Express.js, React.js, Redux, Redux Toolkit, TailwindCSS, DaisyUI, and Node.js.
- Integrated AWS S3 for seamless media uploads.

EDUCATION

Full Stack Web Developer Bootcamp, ESA Coding lab   May 2024 – Dec 2024 | Remote

Bachelor's Degree in Computer Science,   Sep 2018 – Sep 2022 | Al Hadath, Lebanon
Lebanese University, Faculty of Sciences

SKILLS

Web Development — HTML, CSS, JavaScript, TypeScript, PHP, Node.js, Express.js, React.js, Redux Toolkit, Bootstrap, TailwindCSS., **Mobile Development** — Flutter, Dart, Firebase, **Databases** — MongoDB, MySQL, **Additional Skills and Tools** — Git, GitHub, Amazon S3, EC2, Figma, Agile, Vite, Socket.io
