SEPTEMBER 2012 – JULY 2015

EXPERIENCE & TRAINING

Coursera – *Python Online Course Specialization*

SEPTEMBER 2022 - NOVEMBER 2022

This Specialization builds on the success of the Python for Everybody course and will introduce fundamental programming concepts including data structures, networked application program interfaces, and databases, using the Python programming.

Coursera – JavaScript Basics

This course introduces the programming language JavaScript and shows the websites that include the type of interactions students will eventually be able to develop. Learners will understand the importance of how JavaScript was developed and why such history impacts the way JavaScript is currently written and in future releases.

Google Developers Lebanon – *Variety of Online Courses*

SEPTEMBER 2022 - NOVEMBER 2022

A set of online courses covering Intro to Python, flutter, and introduction to full stack development.

Applying different courses on Coursera(Introduction to Front-end development, React Basics, Full Stack, Building web App using php)

PROFILE

Passionate and ambitious software engineer. I believe in real value and real experience, and that our work should contribute more to humanity. I'm a big fan of open source and seek improvement through continuous learning and trying new things.
