

Jihan Shamas

Full-Stack Web Developer

Beirut, Lebanon | +(961) 3 473 351

jihan.shamas@gmail.com | [LinkedIn](#) | [GitHub](#)

As a recent graduate with a passion for Full Stack Web Development, I am eager to launch my career in this exciting field. Through my studies and practical experience, I have gained a deep understanding of the full stack web development process and am skilled in creating dynamic, user-friendly web applications. I have experience collaborating with teams, working under tight deadlines, and delivering projects to a high standard.

Workshops

Project Management: Agile Methodology Workshop

Jan 2023

Peter Faddoul-Mentor at Codi

Agile methodology is an approach to project management that emphasizes flexibility, collaboration, and iterative development. The goal of agile is to deliver high-quality products or services that meet customer needs while adapting to changing requirements and circumstances.

LinkedIn Webinar

Full-Stack Web Developer June 2023

Codi

Master of Science in Mechanical Engineering June 2019

Lebanese International University

Bachelor of Science in Mechanical Engineering June 2017

Lebanese International University

Projects

Zone Outlet | MERN Stack Project | [ZoneOutlet00](#)

Developed a full-stack eCommerce website for selling new and used clothes using MongoDB, Express.js, React.js, and Node.js. Designed and developed a user-friendly and responsive interface for optimal user experience across all devices. Implemented a custom shopping cart feature to allow users to add items to their cart and checkout with cash on delivery payment integration. Created a secure user authentication system to protect user information and ensure privacy.

Aloe Vera on the Roof | Word Press | [Aloe Vera on the Roof](#)

A Website that promotes sustainable living by providing high-quality aloe vera plants and encourages plastic recycling. Developed a custom WordPress website for a small business, incorporating responsive design. Created a user-friendly interface, with clear navigation and effective calls-to-action. Implemented custom functionality using various WordPress plugins, including WooCommerce. Worked closely with the client to understand their specific needs and requirements, delivering the project on-time and within budget.

iLearn | LAMP Stack Project

Developed a custom learning management system (LMS) using LAMP stack. Designed and implemented a user-friendly interface with key features such as course management, student registration, assignment submission, and grading. Conducted thorough testing to ensure proper functionality and identified and resolved issues in a timely manner. Achieved improved student engagement and streamlined learning process. This project demonstrated my expertise in LAMP stack and ability to design and develop custom solutions that meet client needs while ensuring optimal user experience.

Phantom | MERN Stack Project | [Phantom Project](#)

A Website for buying and selling NFTs, which I, with my team, created from scratch. It's fully a MERN-Stack project, as the back-end was coded using Node js, Express js, and MongoDB while the front end is deployed with REACT.
