OBJECTIVE

I am an enthusiastic, self-motivated, reliable and responsible computing graduate seeking a position in Full Stack Web Development. I possess strong technical and soft skills, with proven academic achievements. Passionate about data security and educating the next generation of technology and innovators. I seek a challenging opportunity in a progressive organization that offers career growth, self-development and long-term prospects.

EXPERIENCE

Codi Tech | Full-Stack Web Developer (Nov 2022 - Present)

Beirut, Lebanon

- Used Backend including Laravel, PhpMyAdmin, Express.js, MongoDB, Postman API, REST APIs, API Development, SQLite, Node.js, PHP.
- Developed Frontend using various libraries and frameworks such as ReactJs, HTML5, Cascading Style Sheets (CSS), JavaScript, React Native.
- Worked on WordPress, a Content Management System, that allows users to create, manage and publish digital content, typically on the web.
- Worked on administering and maintaining the server hardware and software using LAMP Stack and Linux.
- Applied the AGILE Methodology of Project Management to plan, organize, and control the flow of work through my projects.

USAID Qitabi Project | Enumerator (Mar 2022- Apr 2022)

Beirut, Lebanon

- Collected data from different official schools in Beirut, Lebanon
- Evaluated the educational level of the students.

EDUCATION

- Bachelor of Engineering in Computer and Communication Engineering | Beirut International University (BIU)
- Baccalaureate Degree in General Sciences | Nouvelle École des Frères

PROJECTS

[E-Commerce Website](#) | *MERN Stack*

Website that enables the owners to sell their products and services online and allows customers to browse and purchase products. *Built using MERN stack, React Js as frontend, NodeJs and Express as backend, and MongoDB as database.*

[Learning Management System](#) | *LAMP Stack*

Software application that enables the administration, delivery, and tracking of educational courses, training programs, or learning and development initiatives. *Built by Laravel as backend, ReactJs as frontend and phpMyadmin as database.*

[Real Client Project](#) | *Wordpress*

This WordPress project is designed for a real client who owns an atelier where customers can purchase clothing or have their old clothes transformed into new ones. The website serves as a platform for people to showcase their clothes and get in touch with the owner.

[Personal Portfolio](#) | *MERN Stack*

Portfolio that showcases an individual's skills, expertise, accomplishments, and experience. Built by MERN Stack, React Js as frontend, NodeJs and Express as backend, and Mnogodb as a database

Weather-API | *React*

Application built with ReactJs allows users to search for weather information of different locations and provides real-time weather updates using data fetched from the public API.
