Profile

A persuasive guy, carrying an exceptional passion and dedication towards my field. Looking to better my experiences by joining a respectable company to flourish even further in my domain.

Experience

Junior Full-Stack Developer

Codi Tech | Nov-2022 - Present

[Codi](#) an NGO graduating top shelf Full-Stack developers to help the youth answer the call of the high tech demands in our current era.

- Experience working with Node.js Express, MySQL, SQL, PHP, and Laravel for the Backend.
- Experience in designing and managing relational databases.
- Developed various applications and websites using JavaScript, React, React Native.
- Configured and managed servers running on the LAMP stack, including setting up and securing the Apache web server, configuring MySQL databases, and deploying PHP applications.
- Used Linux Operating System and administered Linux-based servers.
- Worked in various cross-functional teams using the AGILE Methodology.
- Worked extensively with WordPress to build and customize websites, blogs, and e-commerce platforms.

Projects

- **Angels Protectors | MERN Stack | MongoDB**
I created a responsive Web app with the purpose of aiding stray dogs, I implemented Google Maps JS API as a feature, an OnDuty page for people to submit different kind of information regarding the cases. A Posts page with comments and replies features.
- **Step Up | E-Commerce | MERN Stack | MongoDB**
I worked with a team to deliver a set of requirements based on the client's preferences, which we used as a guide to create a professional dynamic website for an E-Commerce online shoes shop.
- **Learning Management System | LAMP Stack**
I developed an LMS app that was designed to help educators and trainers create and deliver engaging online courses. Used MySQL to design the database schema for the app, which included tables for storing user information, course details, and progress tracking. Laravel was used for the server side.
- **Dental Clinic | Client Project | MERN Stack | MongoDB**
I worked with a team to create a dynamic website for a dental clinic as part of the Codi program who provided us with clients who wanted to execute their ideas into a website.
