Projects

Budget Tracker Project | React Native & Node.js

Developed a comprehensive Budget Tracker application using React Native and Node.js. It offers advanced features for tracking income and expenses, providing valuable financial insights, and empowering users in managing their finances effectively. Showcased my expertise in React Native and Node.js, ensuring a user-friendly and intuitive mobile experience. Prioritized performance, security, and scalability to deliver a seamless Budget Tracker solution.

LMS Advanced Attendance Project | *LAMP Stack*

Developed a responsive LMS using Laravel, PHP, React JS, and React Native. Ensured high performance, scalability, and security while collaborating with team members to meet project milestones.

Clinical Website Project | *MERN Stack*

Developed a clinical website using MERN stack and implemented responsive design, appointment scheduling, patient registration, and online payment processing. Utilized best practices in web development and demonstrated strong problem-solving skills to ensure timely completion of project milestones and deliverables.

Skills

- Ability to work under pressure
- Critical thinking and attention to details
- Organizational and planning abilities
- Excellent communication skills and Teamwork.
