Summary

- I have bachelor in computer science at Lebanese University and I am currently studying M1 in software engineering, I have passion for mobile Android development and discover the limits and boundaries of what this field holds and learning and practicing it from an expert in the field.
I worked at a family business for 7 years, although It wasn't related to my field but I gained a lot of soft skills and knowledge.

Education

- Lebanese university** 2022 - present
Masters in computer science
- Lebanese university** 2019-2022
Bachelor in computer science

Experience

- Abha group for industry and trading** 2015 - 2022
Sales Manager | Accountant | Industry Management
 - I was responsible for assisting customers in a store, helping them find products, answering their questions, providing recommendations, and facilitating the purchasing process. The store caters to customers such as plumbers, electricians, mechanical technicians, carpenters, and builders, helping them acquire the necessary professional power tools and supplies.
 - As an accountant, I was responsible for managing the company's sales, expenses, and product inventory using StockPlus accounting software. Additionally, I supervised a water heaters and solar heaters factory and supervision over workers during the deployment of solar systems.
