Education

Undergraduate Student   Beirut, Lebanon
Lebanese University

   Hello, my name is Moustafa Radi, and I am excited to introduce myself as
   a skilled programmer with multiple programming languages and
   technologies. I possess strong knowledge in HTML5, JavaScript, CSS,
   MySQL, and PHP. Additionally, I have experience working with Laravel.
   I have acquired these skills through university courses, self-study, and
   online tutorials. Although I have not yet had the opportunity to gain
   practical work experience with these skills outside of university projects,
   I am eager to apply my knowledge in a professional setting.

Skills

Version control systems (Git)	● ● ● ○ ○	PHP Laravel	● ● ● ● ○

Projects

Real-Estate Market

Done using Laravel Framework

I have developed a real estate market web application using Laravel. It allows users to login, browse properties, and add their own listings. An admin login is available for market management. The application incorporates authentication and authorization for security.

CV Generator

I created a web application using ASP.NET where users can enter their CV information, browse existing CVs, and delete specific CVs if needed.

Library Management System

I built a JavaFX library management system where users can login, browse books, and administrators can manage the library. The application utilizes design patterns to enhance its functionality.
