WORK EXPERIENCE

Internship at InCoding Company

I had a valuable internship at InCoding Company, where I gained hands-on experience in developing software solutions using .NET Core. This internship allowed me to immerse myself in the world of modern software development and work alongside a team of skilled professionals who taught me a lot of advanced concepts.

WORKING ON

- eCommerce website that sells products, with a backend powered by the .NET framework. For the frontend, we've utilized React and Redux.

ADVANCED SKILLS

- .Net Core
- C#
- RESTful API
- React JS
- MSSQL
- Java
- C
- HTML, CSS
- Javascript

- Git
- GitHub

FAMILIAR WITH

- python
- PHP
- laravel framework
- Mobile development
- JQuery
- Wordpress

EDUCATION

Raffic Hariri Official High School
baccalaureate degree
2016-2020

Lebanese University - Al Hadath
Bachelor of Computer Science
2020-2023

PROJECTS

Library Management System:
Application that facilitates the management of books and users in a library. The application was developed using JavaFX, Scene Builder, and incorporates various design patterns.

Blogging website:
laravel project that allow authenticated user to create, edit delete blogs, and see all the published blogs from another user.

Expense Tracker
.NET application, powered by the Syncfusion package, offers authenticated users a powerful platform for comprehensive financial management.

Category-Management
straightforward category management system using .NET framework, empowering users to effortlessly create, update, and delete categories. All the endpoints for managing categories are hosted in a Web API application.
