EDUCATION

2017- 2021
Bachelor's/ Information Technology
Lebanese International University

CERTIFICATES

Coursera:

- Programming in Python
- Version Control
- Django Web Framework
- APIs

PROGRAMMING LANGUAGES

JavaScript
Python
Java
C#
SQL
HTML

PROFILE

I am a highly skilled full stack developer with 3 years of experience in designing and implementing cutting-edge software solutions. Equipped with a strong foundation in both front-end and back-end development, I excel at creating dynamic and user-friendly applications. My expertise lies in building scalable web applications and leveraging emerging technologies to deliver innovative solutions that exceed client expectations.

EXPERIENCE

Project Title: Discord Clone App (in GitHub)

Description: The Discord Clone App is a project developed using the Django framework, following the Model-View-Template (MVT) architectural pattern.

Technologies: Python, Django, HTML, CSS

Responsibilities & Achievements:

◆ Implemented user authentication and registration functionality, allowing users to create accounts, log in, and manage their profiles.

◆ Developed a user-friendly interface using HTML and CSS, ensuring a visually appealing and intuitive user experience.

◆ Created chat rooms and messaging features, enabling real-time communication between users.

◆ Utilized Django's ORM (Object-Relational Mapping) to design and manage the database structure efficiently.

◆ Conducted thorough testing and debugging to identify and resolve issues, ensuring a stable and reliable application.

ABOUT ME

Result-Oriented: A driven and goal-focused mindset, consistently striving for excellence and delivering high-quality outcomes. Demonstrated ability to set clear objectives, work efficiently, and meet deadlines to achieve desired results.

Organized: Strong organizational skills, with the ability to prioritize tasks, manage multiple projects simultaneously, and maintain attention to detail.

Problem-Solving: A logical and analytical thinker with exceptional problem-solving abilities. Proficient in identifying and understanding complex issues, formulating innovative solutions, and implementing effective strategies to overcome challenges.

Continuous Learning: A commitment to continuous learning and professional development. Actively seeking opportunities to enhance knowledge and skills through self-study, attending workshops or seminars, and staying informed about industry trends and best practices.

Project Title: Social Media App (in GitHub)

Description: The Social Media Platform is a project built using the MERN (MongoDB, Express, React, Node.js) tech stack. It aims to provide users with a platform for social networking, allowing them to create profiles, connect with friends, share posts.

Technologies: MongoDB, Express, React, Node.js

Additional Technologies and Packages:

- **Server-side:** Body Parser, Bcrypt, Cors, Dotenv,
  - GridFS, Multer, Helmet, Morgan, Mongoose.
- **Client-side:** Redux/Toolkit, Redux Persist,
  - React-Redux, Material-UI (MUI), Formik, yup.

Responsibilities & Achievements:

◆ Designed and implemented the user authentication and registration system, incorporating features such as login, signup, and password encryption using Bcrypt.

◆ Developed RESTful API endpoints for user profiles, posts, and interactions using Express and MongoDB with Mongoose.

◆ Integrated GridFS and Multer for handling file uploads, allowing users to share images and media.

◆ Utilized Redux/Toolkit and React-Redux to manage the application's state and ensure data consistency across components.

◆ Designed and developed responsive user interfaces using Material-UI (MUI), providing an intuitive and visually appealing user experience.

◆Utilized Formik and Yup to build and validate forms, ensuring accurate and reliable data input from users.

◆Conducted thorough testing and debugging to identify and fix issues, ensuring a stable and reliable application.
