PROFESSIONAL EXPERIENCE

Full-Stack Software Engineer

Freelance | May 2023- Present

- Led the creation of a complete e-commerce site using the MERN stack.
- Designed the site with React.js, handled the functions with Node.js/Express.js, and managed data with MongoDB.
- Managed the entire project from planning to launch.
- Worked closely with clients to deliver a fully functional solution.

Software Engineering Intern

Enkrypt Pty Ltd | August 2023- Present   Australia

- Collaborated on cross-functional teams to develop and enhance software solutions.
- Assisted in designing, implementing, and optimizing software components.
- Conducted code reviews, identified improvements, and contributed to codebase enhancements.
- Worked with senior engineers to troubleshoot and improve system reliability.
- Contributed to project documentation efforts.

Web Developer Intern

CedarsByte | June 2023 - August 2023   Lebanon

- Developed web applications using React, Tailwind CSS, and Framer Motion for engaging user interfaces.
- Enhanced user interaction by optimizing loading times and ensuring cross-browser compatibility.
- Created a Node.js, Express, React, MongoDB, Recharts.js, and Material UI analytics dashboard.
- Pioneered real-time data visualization and implemented strong security measures.
- Collaborated, met deadlines, excelled in code review, and problem-solving.

Awards:

- Standout performer Award
- Recommendation Letter
