

# Mhamad Ahmad

Computer and communication engineer  
ossmanmhamad705@gmail.com | +961 76166313 | Aidamoun-Akkar

## Education

Notre -Dame University Louise	Lebanon – Zouk Mosbeh
Bachelor of engineering in Computer and Communication engineering	September 2019 - May 2024

## Experience

Baytna Restaurant   Data Entry	Tripoli, Lebanon   Jan 2021 - May 2023
Network Engineering intern  Choueiri Group Company	Beirut, Lebanon   June – August 2023
Private Tutor   Taught courses in Java programming and data structures to many students	2019-2024
Yallamvp   Python and Django software engineering intern	Remote, Florida   October-December 2023

## Skills

- Proficiency in Mobile application development using Flutter and Dart and have done many projects and applications like Weather application and TODO application.
- Proficient in data structures and algorithms, with experience implementing them in projects using Java C++ and Python
- Experienced in object-oriented programming principles and practices, with proficiency in languages such as Java and Python.
- Proficiency in using tools, software, and equipment related to computer and communication engineering, such as MATLAB, VHDL, Cisco Networking, and others.
- Python: Proficient in some python libraries like Numpy, Pandas and in data visualization like matplotlib and Seaborn.
- MySQL: Proficient in working with MySQL databases, including designing schemas, writing complex queries and optimizing data performance.
- MATLAB: Used for engineering coursework.
- Computer and communication Engineering: Strong background in the principles of computer engineering, digital system, communication protocols and network architecture.
- Problem solving: ability to identify, analyze and solve complex problems.
- Communication skills: effective communication and collaboration with team members, clients, and stakeholders.
- Continuous learning: willingness to learn and stay updated with the latest technologies and trends in the industry.
- A solid knowledge of some electrical engineering courses and have worked on many software like Multisim,Proteus, LTspice,...

## Projects

- Weather and TODO application	Flutter, Dart,APIs
- Hospital Management System	SQL
- Student management system	Java
- Music Store Management System	SQL
- Cinema management System	SQL
- Document classification Senior Data-science project	Python
- Lottery game	C++

## Languages

Arabic: Native language

English: Fluent

French: Excellent
