## Third year Computer Science Student

**Degrees:** Third year student, Computer Science, LU

**Languages:** Arabic, English, French

---

### EDUCATION

---

<b>Computer Science</b> , third year, Lebanese University	<b>Present</b>
---	----------------

---

### Relevant Coursework

---

Data Structures and Algorithms

Object-Oriented Programming

Database Management Systems

Software Engineering

Web Development

Project management

Operating Systems

App development

Networks

---

### Skills

---

**Programming languages:** Java, C++, c sharp .

**Web development:** HTML, CSS, php, JavaScript

**Database management:** MySQL

- Learning the process of designing, creating, testing, and maintaining software in a systematic and disciplined manner, with the goal of producing high-quality software that meets the needs of users and stakeholders.

- Logic programming consists of a set of logical statements that describe a problem or a system, and a set of rules that govern how the program should derive solutions to the problem or simulate the system. Prolog is a popular example of a logic programming language.
- Developing web applications and websites using various programming languages, frameworks, and software tools. Creating the front-end user interface, designing the website's layout, and programming the back-end functionality.
- Work with clients or other team members to determine project requirements and be involved in testing and debugging the website.
