## Objective

Detail-oriented computer science student seeking an internship position to apply and enhance technical skills in a professional environment.

## Education

- **Holy Spirit University of Kaslik**  
3<sup>rd</sup> year Computer Science

## Relevant Coursework

- **Full Stack Development (Codecademy)**  
React, Redux, Git, Node.js, PostgreSQL
- **Mobile Programming (University Course)**  
React, React Native

## Skills

- Programming Languages: C++, Java, JavaScript
- Web Development: HTML, CSS, React, Redux
- Mobile Development: React Native
- Backend Development: Node.js, PostgreSQL
- Version Control: Git

## Projects

- **Reddit Client App (Front-end Project, React, Redux)**  
Developed a Reddit client application using React and Redux, leveraging the Reddit API. Implemented features such as viewing subreddits, browsing posts, and viewing comments.
- **Movie Mobile App (Mobile Project, React Native, Firebase)**  
Created a movie app using React Native and Firebase authentication. Implemented functionalities like displaying movie categories, searching for movies, and viewing movie details. Utilized native features such as Touch ID, event handling, and gallery integration.
- **Ecommerce Store (Backend Project, Node.js, PostgreSQL)**

Implemented the backend for an ecommerce store using Node.js and PostgreSQL. Set up the database schema, including user authentication with password hashing. Developed APIs to manage user sign-in and sign-out functionality, as well as storing and retrieving products from the database.
